*Other Engineer's Services must be outlined in detail on the required certified engineer's estimate.

1.3 AVAILABILITY OF LOCAL FUNDS:

Attach a summary from the Chief Financial Officer listed in section 5.2 listing all local share funds budgeted for the project and the date they are anticipated to be available.

2.0 PROJECT INFORMATION

IMPORTANT: If project is multi-jurisdictional, information must be consolidated in this section.

2.1 PROJECT NAME: Gest Street Bridge Replacement over the Mill Creek

2.2 PROJECT DESCRIPTION - (Sections a through d):

a: SPECIFIC LOCATION:

Gest Street Bridge over the Mill Creek.

PROJECT ZIP CODE: 45223

b: PROJECT COMPONENTS:

This project involves removing the existing bridge and replacing it with a new single span steel beam bridge. Also, the project will include construction of an adjacent utility bridge for the relocation City water, electrical and telecommunications utilities currently supported by the roadway bridge. Other work will include approach roadway improvements including the replacement of pavement, curb, sidewalk and stormwater facilities.

c: PHYSICAL DIMENSIONS / CHARACTERISTICS:

BRIDGE

Existing length = 90.0'

Existing width = 44.0' (two 11.6' lanes with two 6.0' walks).

Proposed length = 100.0'

Proposed width = 44.0' (two 14.0' lanes with two 7.0' walks).

ROADWAY

The existing and proposed width varies from 28' to 32'. Approximately 250' of roadway will be replaced or rehabilitated.

d: DESIGN SERVICE CAPACITY:

IMPORTANT: Detail shall be included regarding current service capacity vs proposed service level. If road or bridge project, include ADT. If water or wastewater project, include both current residential rates based on monthly usage of 7,756 gallon per household. Attach current rate ordinance.

1994 ADT = 6532 vehicles/day

2014 ADT = 9877 vehicles/day

2.3 USEFUL LIFE / COST ESTIMATE: Project Useful Life: 50 Years.

Attach Registered Professional Engineer's statement, with original seal and signature certifying the project's useful life indicated above and estimated cost.

3.0 REPAIR/REPLACEMENT or NEW/EXPANSION:

TOTAL PORTION OF PROJECT REPAIR/REPLACEMENT \$ 1,500,000 100%
State Funds Requested for Repair and Replacement \$ 1,200,000 80%

TOTAL PORTION OF PROJECT NEW/EXPANSION \$ _____ %
State Funds Requested for New and Expansion \$ _____ %

4.0 PROJECT SCHEDULE:*

	BEGIN DATE	END DATE
4.1 Engineering/Design:	<u>10/1/94</u>	<u>7/1/95</u>
4.2 Bid Advertisement:	<u>8/1/95</u>	<u>9/1/95</u>
4.3 Construction:	<u>11/1/95</u>	<u>5/1/97</u>

* Failure to meet project schedule may result in termination of agreement for approved projects. Modification of dates must be approved in writing by the Commission once the Project Agreement has been executed. Dates should assume project agreement approval/release on July 1st. of the Program Year applied for.

6.0 ATTACHMENTS/COMPLETENESS REVIEW:

Check each section below, confirming that all required information is included in this application.

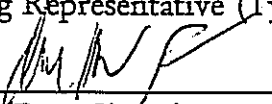

- X A certified copy of the legislation by the governing body of the applicant authorizing a designated official to submit this application and execute contracts. (Attach)
- X A summary from the applicant's Chief Financial Officer listing all local share funds budgeted for the project and the date they are anticipated to be available. (Attach)
- X A registered professional engineer's estimate of projects useful life and cost estimate, as required in 164-1-14 and 164-1-16 of the Ohio Administrative Code. Estimates shall contain engineer's original seal and signature. (Attach)
- N/A A copy of the cooperation agreement(s) if this project involves more than one subdivision or district. (Attach)
- X Capital Improvements Report: (Required by 164 O.R.C. on standard form)
A: Attached.
X B: Report/Update Filed with the Commission within the last twelve months.
- N/A Floodplain Management Permit: Required if project is in 100 year floodplain. See Instructions.
- X Supporting Documentation: Materials such as additional project description, photographs, economic impact (temporary and/or full time jobs likely to be created as a result of the project), and other information to assist your district committee in ranking your project.

7.0 APPLICANT CERTIFICATION:

The undersigned certifies that: (1) he/she is legally authorized to request and accept financial assistance from the Ohio Public Works Commission; (2) that to the best of his/her knowledge and belief, all representations that are part of this application are true and correct; (3) that all official documents and commitments of the applicant that are part of this application have been duly authorized by the governing body of the applicant; and, (4) should the requested financial assistance be provided, that in the execution of this project, the applicant will comply with all assurances required by Ohio Law, including those involving minority business utilization, Buy Ohio, and prevailing wages.

IMPORTANT: Applicant certifies that physical construction on the project as defined in the application has NOT begun, and will not begin until a Project Agreement on this project has been executed with the Ohio Public Works Commission. Action to the contrary will result in termination of the agreement and withdrawal of Ohio Public Works Commission funding of the project.

Subject: Status of Funds for Local Share of 1995 SCIP/LTIP Program

Dear Mr. Bicking:

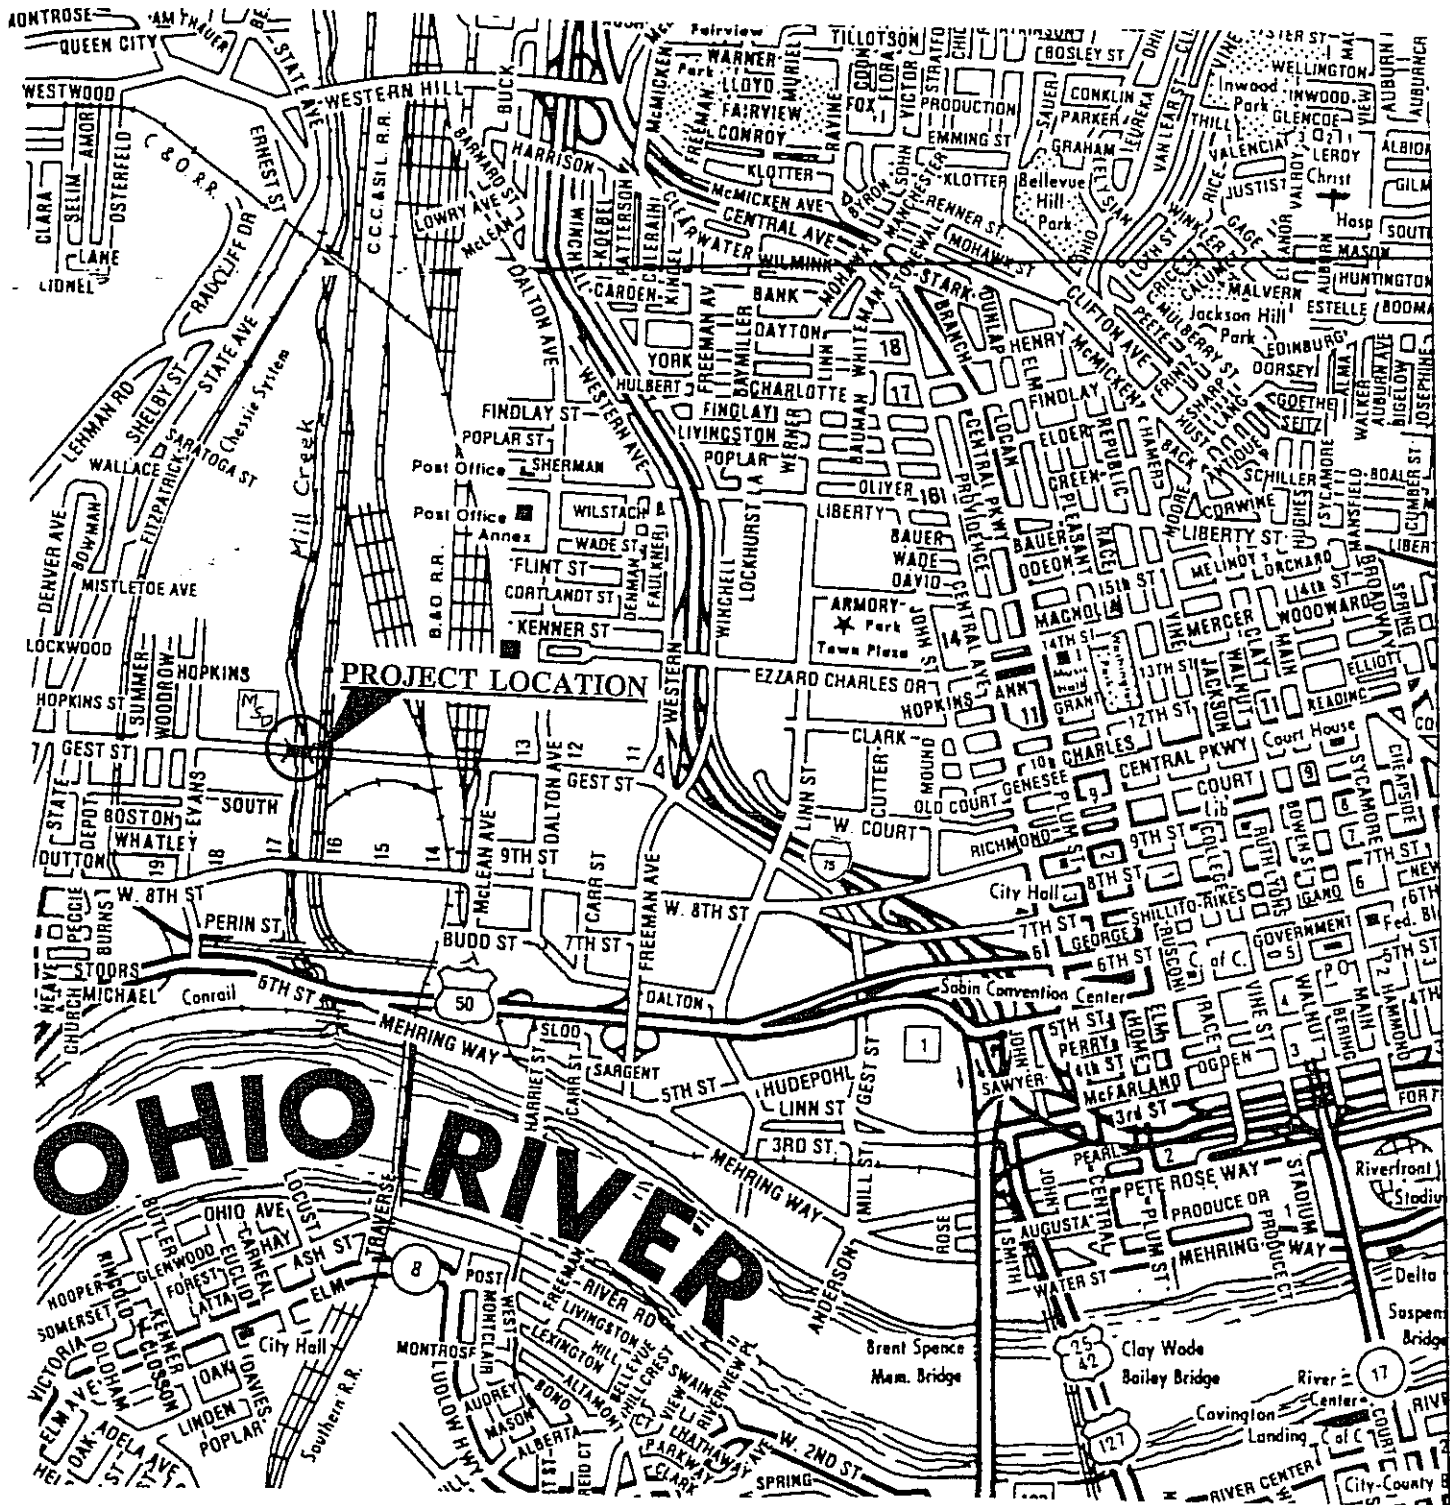

The local matching share for the 1995 SCIP/LTIP Projects (Round 9 Funding) is recommended by the City Manager for funding in the City's 1995 Capital Improvement Program. The funds are coming from Street Improvement Bonds which are scheduled for sale in the early part of 1995.

If you have any questions or need additional information, please contact me at 513-352-3731.

Sincerely,

F. A. Dawson
Director of Finance

GEST STREET BRIDGE OVER THE MILL CREEK
VICINITY MAP

City of Cincinnati

An Ordinance No. 421 1993

603H
J.S.G.

AUTHORIZING the City Manager to apply for and accept street rehabilitation, street improvement, bridge rehabilitation and bridge replacement project funding grants from the State of Ohio, Ohio Public Works Commission, in the approximate amount of \$9,163,000, and to execute any agreements necessary for the receipt and administration of said grants.

WHEREAS, the State Capital Improvement Program and Local Transportation Improvement Program provide for infrastructure funding; and

WHEREAS, the District 2 Integrating Committee is accepting applications for projects within Hamilton County, the State of Ohio; and

WHEREAS, the City of Cincinnati has the required \$4,199,000 in matching funds for 1994, for fifteen (15) street rehabilitation projects; namely Anderson Ferry Road, Crawford Road, Dalton Street, Daly Road, West Eighth Street, Elberon Avenue, Freeman Avenue, Gest Street, Linn Street, Madison Road, Mehring Way, Pete Rose Way, Plainville Road and Reading Road; and five (5) street improvement projects; namely North Crescent Avenue, North Bend Road, Vine Street at Forest/Woolper Intersection, Woodford Road and Werk Road; and two (2) bridge replacement projects; namely Dreman Avenue over West Fork Channel and North Bend Road over Millcreek; and one (1) bridge rehabilitation project; namely Beekman Street over Millcreek; now, therefore,

BE IT ORDAINED by the Council of the City of Cincinnati, State of Ohio:

Section 1. That the City Manager is hereby authorized to execute and file applications, on behalf of the City of Cincinnati, with the Ohio Public Works Commission through the Hamilton County District 2 Integrating Committee, for grants, in the approximate amount of \$9,163,000 for funding fifteen (15) street rehabilitation

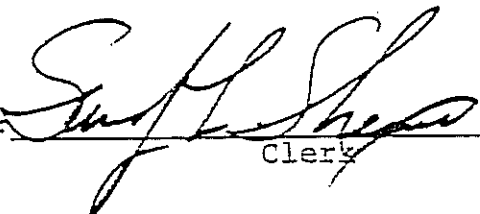

projects; namely Anderson Ferry Road, Crawford Road, Dalton Street, Daly Road, West Eighth Street, Elberon Avenue, Freeman Avenue, Gest Street, Linn Street, Madison Road, Mehring Way, Pete Rose Way, Plainville Road and Reading Road; and five (5) street improvement projects; namely North Crescent Avenue, North Bend Road, Vine Street at Forest/Woolper Intersection, Woodford Road and Werk Road; and two (2) bridge replacement projects; namely Dremman Avenue over West Fork Channel and North Bend Road over Millcreek; and one (1) bridge rehabilitation project; namely Beekman Street over Millcreek; and to accept such grants if awarded by the Ohio Public Works Commission.

Section 2. That the City Manger is hereby authorized to execute such agreements and other documents as are required by the State for receipt and administration of the above grants.

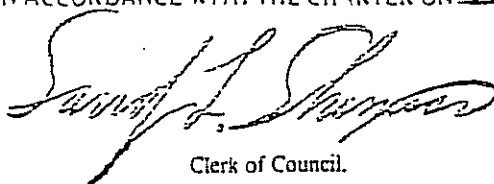

Section 3. This Ordinance shall take effect from and at the earliest period allowed by law.

Passed November 24 A.D., 1993

Mayor

Attest: 
Clerk

I HEREBY CERTIFY THAT ORDINANCE NO. 421
19 93 WAS PUBLISHED IN THE CITY BULLETIN
IN ACCORDANCE WITH THE CHARTER ON 12-7-93

Clerk of Council.

GEST STREET BRIDGE REPLACEMENT OVER THE MILL CREEK

**East approach showing lane width restriction
and exposure of girders to impact.**

Typical impact damage to exposed girders.

GEST STREET BRIDGE REPLACEMENT OVER THE MILL CREEK

Typical section loss at deck/girder web interface.

Typical section loss to sway bracing and stiffeners.

GEST STREET BRIDGE REPLACEMENT OVER THE MILL CREEK

Failed bearing.

Deterioration of sandstone abutment face.

ADDITIONAL SUPPORT INFORMATION

For Program Year 1995 (July 1, 1995 through June 30, 1996), jurisdictions shall provide the following support information to help determine which projects will be funded. Information on this form must be accurate, and where called for, based on sound engineering principles. Documentation to substantiate the individual items may be required by the Support Staff if information does not appear to be accurate.

- 1) What is the condition of the existing infrastructure to be replaced, repaired, or expanded? For bridges, submit a copy of the current State form BR-86.

Closed _____

Poor X

Fair _____

Good _____

Give a brief statement of the nature of the deficiency of the present facility such as: inadequate load capacity (bridge); surface type and width; number of lanes; structural condition; substandard design elements such as berm width, grades, curves, sight distances, drainage structures, or inadequate service capacity. If known, give the approximate age of the infrastructure to be replaced, repaired, or expanded.

 Please see attached sheet.

- 2) If State Capital Improvement funds are awarded, how soon (in weeks or months) after receiving the Project Agreement from OPWC (tentatively set for July 1, 1995) would the project be under contract? The Support Staff will be reviewing status reports of previous projects to help judge the accuracy of a particular jurisdiction's anticipated project schedule.

 4 months

Are preliminary plans or engineering completed? Yes

Are detailed construction plans completed? No

Are all right-of-way and easements acquired? Yes

Are all utility coordinations completed? No

Give an estimate of time, in weeks or months, to complete any item above not yet completed.

 9 months to complete detail Plans.

GEST STREET BRIDGE REPLACEMENT
OVER THE MILL CREEK

ADDITIONAL SUPPORT INFORMATION

1.)

- a.) The existing bridge is of through-girder design with each girder being immediately adjacent to each 11'-6" lane, exposing them to possible impact. The proposed bridge will have the steel girders located beneath the bridge deck.
- b.) The roadway lane widths of the proposed bridge will be increased from 11'-6" (existing) to 14'-0".
- c.) The existing 70 year old bridge was constructed in 1924 upon stone abutments of a previous bridge of unknown age. The bearings are failing, there is considerable loss of section in the girders, and impact damage to the girder flanges, lateral bracing and stiffeners.
- d.) The vertical approach alignment at both ends of the bridge is extremely poor, causing many vehicles to "bottom out", as indicated by scarring of the approach pavement.
- e.) The existing bridge supports a 36" water main, 18" water main, 21" gas main, 12 cable main telephone trunk line, fiber optic telecommunication lines and sewer pump house power lines. Relocation of these utilities to the proposed adjacent utility bridge will facilitate bridge and utility construction, as well as, aid in the required maintenance of traffic for nearby industries. Future rehabilitation work will be less costly, quicker and easier with the utilities removed from the bridge.
- f.) A temporary concrete wearing surface has been installed over the existing, severely deteriorated, concrete deck.

3) How will the proposed project impact the general health, safety and welfare of the service area? (Typical examples may include the effects of the completed project on accident rates, emergency response time, fire protection, health hazards, user benefits, and commerce.) Please be specific and provide documentation if necessary to substantiate the data.

Safety hazards from lane width restriction (11'-6") and impact-vulnerable through-girders will be eliminated.

4) What type of funds are to be utilized for the local share for this project?

Federal _____	ODOT _____	Local <u> X </u>
MRF _____	OWDA _____	CD _____
Other _____		

Note: If MRF funds are being used for the local share, the MRF application must have been filed by August 1, 1994 for this project with the Hamilton County Engineer's Office.

The minimum amount of matching funds for grant projects (local share) must be at least 10% of the TOTAL CONSTRUCTION COST. What percentage of matching funds are being committed to this project?

 20 %

5) Has any formal action by a federal, state, or local government agency resulted in a complete or partial ban of the use or expansion of use for the involved infrastructure? (Typical examples include weight limits, truck restrictions, and moratoriums or limitations on issuance of building permits.) A copy of the legislation must be submitted with the application. THE BAN MUST HAVE AN ENGINEERING JUSTIFICATION TO BE VALID.

Complete Ban _____ Partial Ban _____ No Ban X

Will the ban be removed after the project is completed?

Yes _____ No _____

- 6) What is the total number of existing users that will benefit as a result of the proposed project?

7840

For roads and bridges, multiply current documented Average Daily Traffic by 1.20. For public transit, submit documentation substantiating the count. Where the facility currently has any restrictions or is partially closed, use documented traffic counts prior to the restriction. For storm sewers, sanitary sewers, water lines, and other related facilities, multiply the number of households in the service area by 4.

- 7) Has the jurisdiction developed a Five Year Capital Improvement Plan as required in O.R.C., chapter 164? (This must be included with the application to be considered for funding.)

Yes X No

- 8) Give a brief statement concerning the regional significance of the infrastructure to be replaced, repaired, or expanded.

The Gest Street bridge services a large industrial area of Cincinnati, and also support a majority of the utilities that service the western half of Cincinnati.

STATE CAPITAL IMPROVEMENT PROGRAM

ROUND NO. 9

PROGRAM YEAR 1995 PROJECT SELECTION CRITERIA - JULY 1, 1995 TO JUNE 30, 1996

ADOPTED BY THE DISTRICT 2 INTEGRATING COMMITTEE

June 27, 1994

JURISDICTION/AGENCY: CINCINNATI

NAME OF PROJECT: GEST ST. BRIDGE

TOTAL POINTS FOR THIS PROJECT: 52 RATING TEAM NO. 4

NO. OF POINTS

- 10 1) If SCIP Funds are granted, when would the construction contract be awarded? (The Support Staff will assign points based on engineering experience.)
- 10 Points - Will be under contract by December 31, 1995
 - 5 Points - Will be under contract by March 30, 1996
 - 0 Points - Will not be under contract by March 30, 1996
- 16 2) What is the condition of the infrastructure to be replaced or repaired? For bridges, base condition on latest general appraisal and condition rating.
- 20 Points - Poor Condition
 - 16 Points -
 - 12 Points - Fair to Poor Condition
 - 8 Points -
 - 4 Points - Fair Condition

NOTE: If the infrastructure is in "good" or better condition it will NOT be considered for SCIP funding.

3

- 3) If the project is built, what will be its effect on the facility's serviceability?

5 Points - Significant effect (e.g., widen to and add lanes along entire project)
4 Points - Moderate to significant effect
3 Points - Moderate effect (e.g., widen exist. lanes)
2 Points - Moderate to little effect
1 Points - Little or no effect (e.g., street or bridge deck rehabilitation)

6

- 4) How important is the project to HEALTH, SAFETY, AND WELFARE of the public and the citizens of the District and/or service area?

10 Points - Highly significant importance, with substantial impact on all 3 factors
8 Points - Considerably significant importance, with substantial impact on 2 factors OR noticeable impact on all 3 factors
6 Points - Moderate importance, with substantial impact on 1 factor or noticeable impact on 2 factors
4 Points - Minimal importance, with noticeable impact on 1 factor
2 Points - No measurable impact

6

- 5) What is the overall economic health of the jurisdiction?

10 Points - Poor
8 Points -
6 Points - Fair
4 Points -
2 Points - Excellent

2

- 6) What matching funds are being committed to the project, expressed as a percentage of the TOTAL CONSTRUCTION COST? Loan and Credit Enhancement projects automatically receive 5 points, and no match is required. All grant funded projects require a minimum of 10% matching funds.

5 Points - 50% or more
4 Points - 40% to 49.99%
3 Points - 30% to 39.99%
2 Points - 20% to 29.99%
1 Point - 10% to 19.99%

0

- 7) Has any formal action by a federal, state, or local government agency resulted in a partial or complete ban of the usage or expansion of the usage for the involved infrastructure? POINTS MAY ONLY BE AWARDED IF THE END RESULT OF THE PROJECT WILL CAUSE THE BAN TO BE LIFTED.

5 Points - Complete or significant ban
3 Points - Partial or moderate ban
0 Points - No ban of any kind

4

- 8) What is the total number of existing daily users that will benefit as a result of the proposed project? Appropriate criteria include current traffic counts, households served, when converted to a measurement of persons. Public transit users are permitted to be counted for roads and bridges, but only when certifiable ridership figures are provided.

5 Points - 10,000 or more
4 Points - 7,500 to 9,999
3 Points - 5,000 to 7,499
2 Points - 2,500 to 4,999
1 Point - 2,499 and under

2 3

- 9) Does the infrastructure have REGIONAL impact? Consider origins and destinations of traffic, functional classification, size of service area, number of jurisdictions served, etc.

5 Points - Major impact (e.g., major multi-jurisdictional route, primary feed route to an Interstate, Federal - Aid Primary routes)
4 Points -
3 Points - Moderate impact (e.g., principal thoroughfares, Federal - Aid Urban routes)
2 Points -
1 Point - Minimal or no impact (e.g., cul-de-sacs, subdivision streets)

2

- 10) Has the jurisdiction enacted the optional \$5 license plate fee, an infrastructure levy, a user fee, or a dedicated tax for infrastructure?

2 Points - Two of the above
1 Point - One of the above
0 Points - None of the above

ADDENDUM TO THE RATING SYSTEM
DEFINITIONS

CRITERION 1 - ABILITY TO PROCEED

The Support Staff will assign points based on:

- 1) Engineering experience
- 2) The information on the Additional Support Information, as verified where necessary.
- 3) The applicant's past SCIP/LTIP record of successfully projecting project schedules on similar types of projects.

If a project rating on this item is reduced by the Support Staff because of a questionable schedule, and still receives funding, the submitting jurisdiction will be permitted to amend the Project Schedule accordingly.

CRITERION 2 - CONDITION

Poor - Condition is dangerous, unsafe or unusable

Fair to Poor - Condition is inadequate or substandard

Fair - Condition is average, not good or poor

CRITERION 5 - ECONOMIC HEALTH

The following factors are used to determine economic health:

- 1) Median per capita income
- 2) Per capita assessed valuation of the total community real estate and personal property
- 3) Poverty indicators
- 4) Effective tax rates
- 5) Total corporate debt as a percentage of assessed valuation
- 6) Municipal revenues and expenditures per capita

CRITERION 9 - REGIONAL IMPACT

Major impact - Primary water or sewer main serving an entire system

Moderate impact - Waterline or storm sewer serving only part of a system

Minimal impact - Individual waterline or storm sewer not part of a system
